Why walk with us?

World Class Guides

We think the best way to experience amazing places is in the company of amazing people. That's why our local guides are world-class.

They're passionate outdoor lovers, inspiring storytellers, and hospitable hosts. Our people truly are our best asset and we can't wait for you to meet them. Nothing but the best for you.

100% Carbon Neutral

The Tasmanian Walking Company operates as a 100% carbon-neutral business.

We have achieved global Gold Standard Certification for our continued effort towards carbon removal and climate change action. Our commitment to emissions reduction also extends to supporting Australia's largest revegetation project — the Yarra Yarra Biodiversity Corridor Project, in Western Australia.

Small Groups, Wild Places

Group size matters. That's why we've spent years designing the perfect small group walking experience. Our small groups of 8-14 guests offer an intimate experience of nature, enhanced by personal interpretation from our world-class guides. Explore World Heritage wilderness by day, breathe the Earth's cleanest air, and enjoy the freedom of wild, wide open spaces. By night, celebrate with your fellow walkers in comfort, and safety.

Lightweight backpacks

We've designed our walking experiences to make sure your focus is on nature, not the weight of your pack. When you walk with us, you'll carry the lightest possible backpack — containing only your clothes, water bottle and lunch. We'll carry the heavy load so you can do what you came for — enjoying nature.

Giving Back To Nature

We treasure the natural environment that we're lucky enough to work in. The Tasmanian Walking Company gives back to that environment by supporting education, training, reforestation and wildlife programs that contribute to the conservation and cultural heritage of our wild places.

To continue this important work, we've created the not-for-profit Tasmanian Walking Company Foundation.

Multi-Award Winning Operator

Over the past 30 years, the Tasmanian Walking Company has received many awards. But we're not in this for the prizes. We see these awards as a confirmation of our commitment to providing the best possible experience for our guests, and to always operating with respect and care for the natural places in which we work.

Private Eco-Accommodation

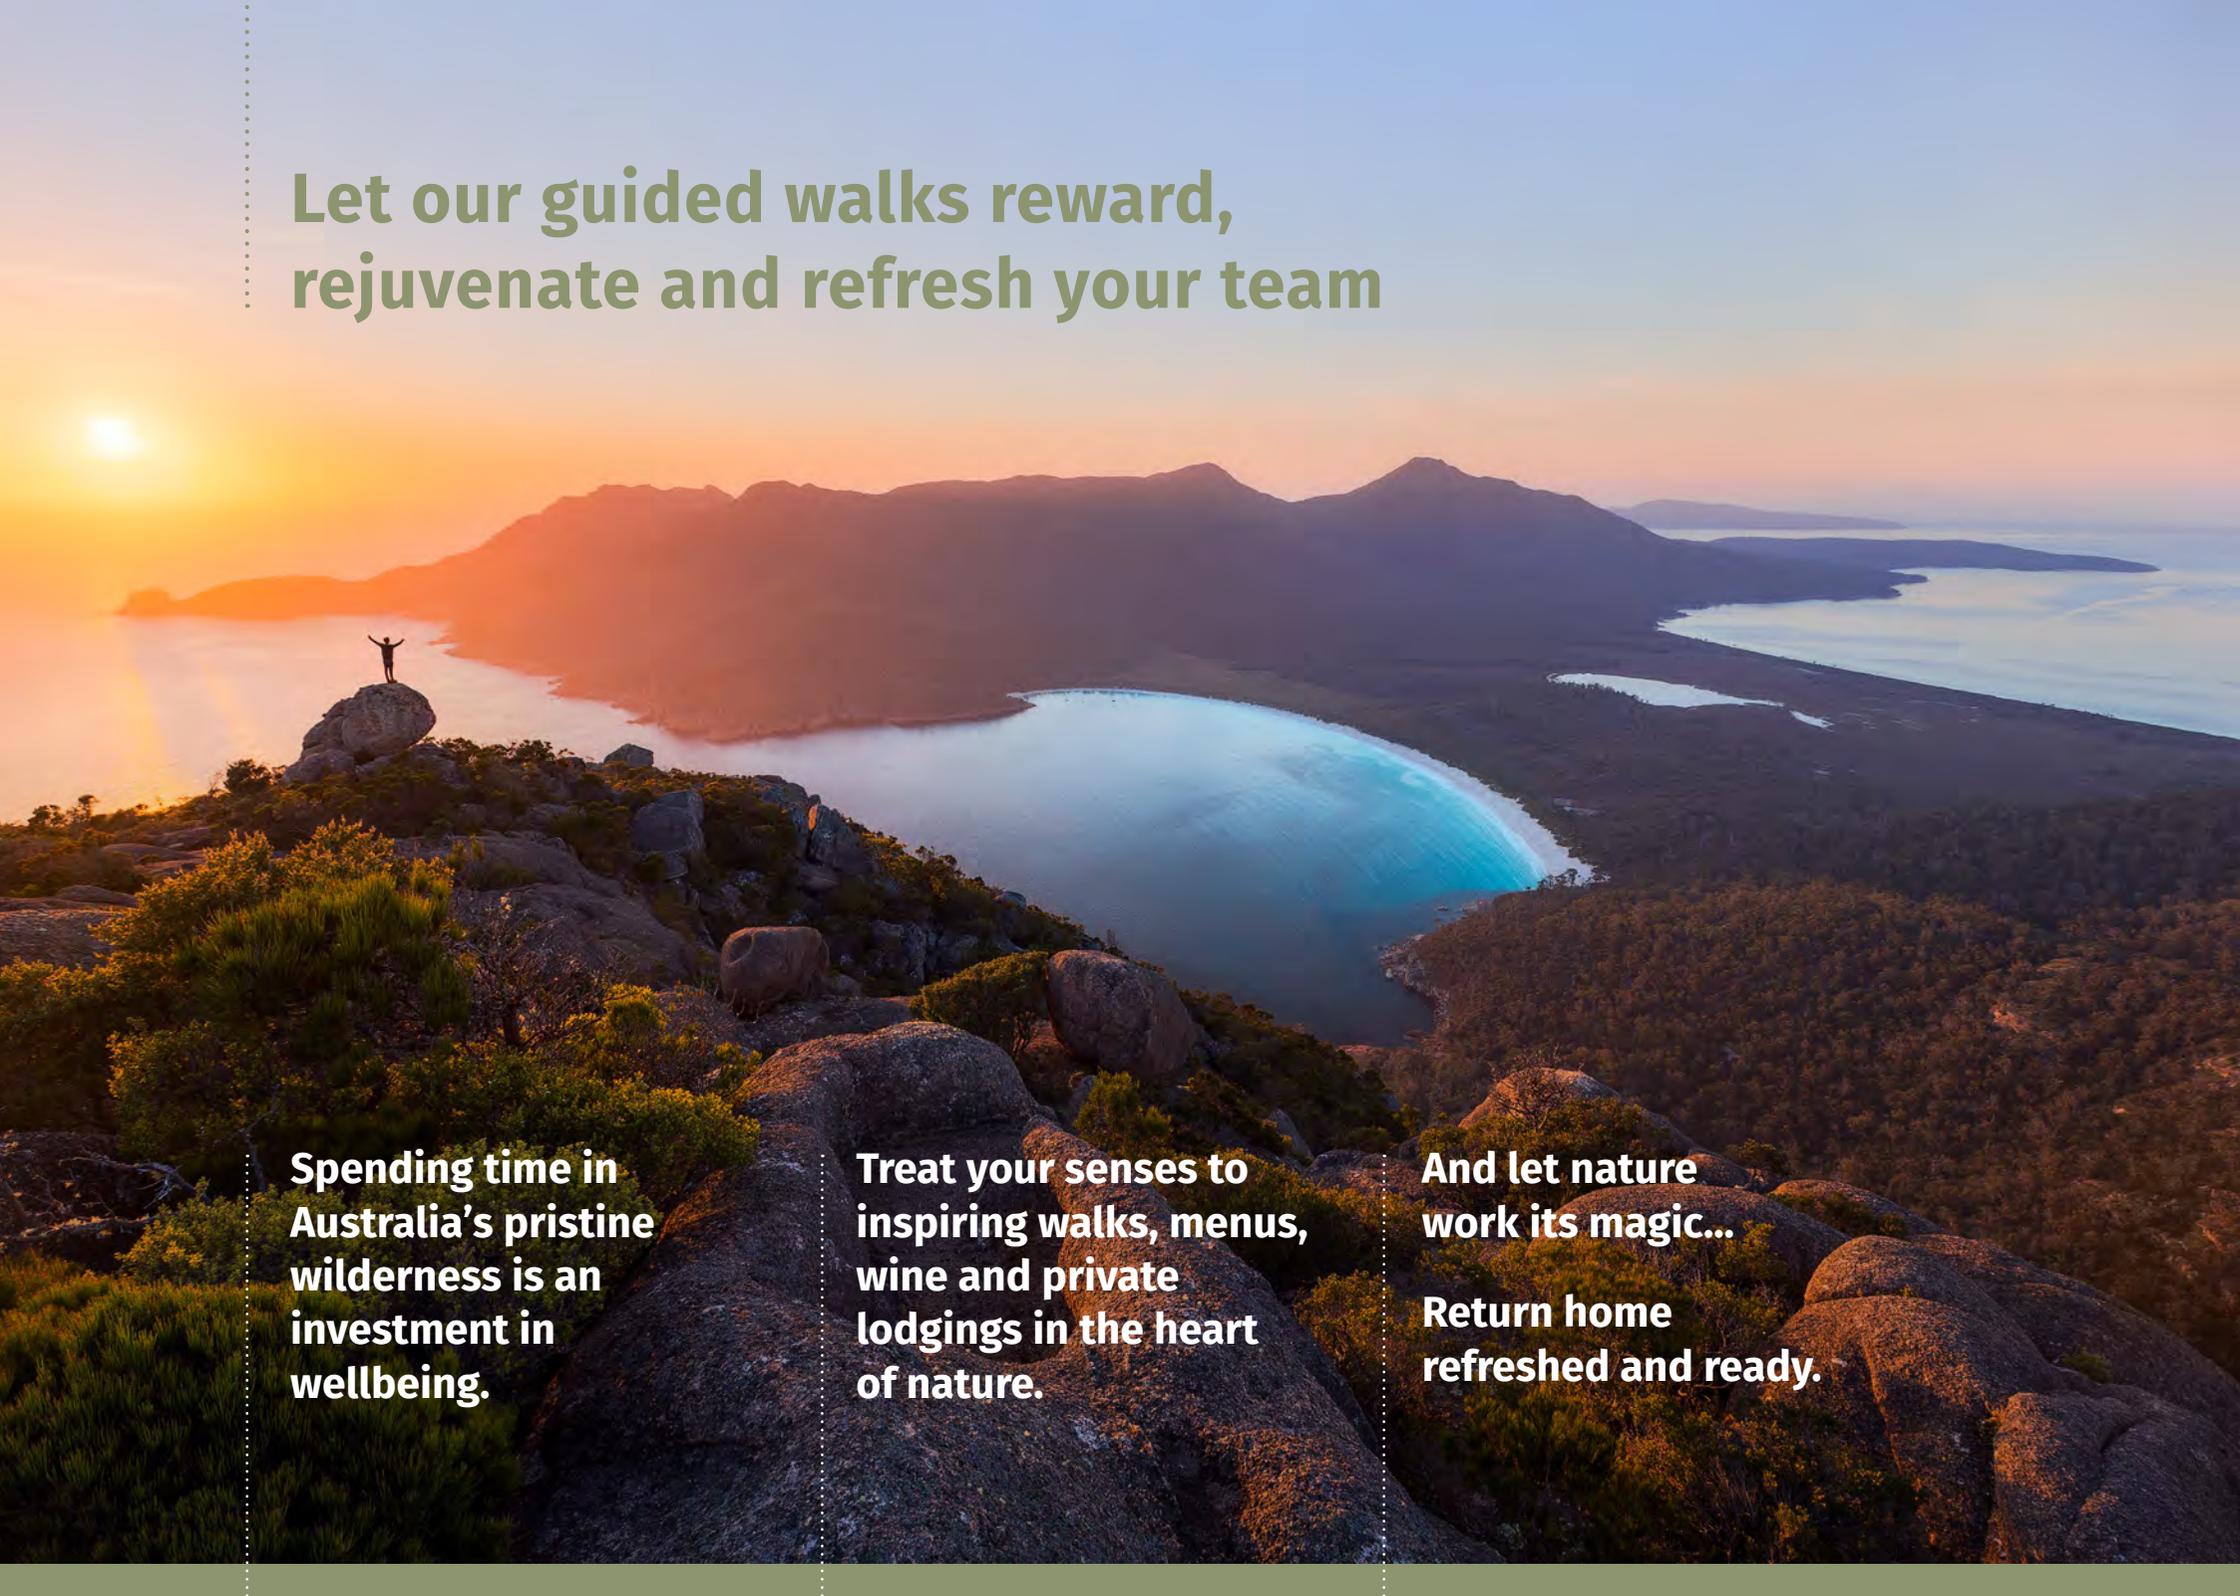

Your wilderness experience with the Tasmanian Walking Company doesn't end when you finish walking for the day. Even at night, you'll still be immersed in nature.

All of our sustainably built, private eco-accommodation is located within, or on the edge of Tasmania's beautiful national parks—for your exclusive use.

30 Years' Experience

Since 1987, we've guided more than 80,000 guests through Australia's beautiful natural places. We're a trusted company of experienced leaders, guides and walk operators, with a passionate commitment to sustainability. We continue to share our love of wild places with our guests through our exceptional walking experiences, and world-class guiding, storytelling and interpretation.

**Let our guided walks reward,
rejuvenate and refresh your team**

**Spending time in
Australia's pristine
wilderness is an
investment in
wellbeing.**

**Treat your senses to
inspiring walks, menus,
wine and private
lodgings in the heart
of nature.**

**And let nature
work its magic...
Return home
refreshed and ready.**
